PRELIMINARY AMENDMENT

Sir:

In The Claims:

Please amend claims 1 and 4 as set forth below:

1. (Amended) An injection molding apparatus for making a molded part, comprising:
- an injection molding machine for injecting molten resin, said injection molding machine including a screw cylinder having a tip, a nozzle at said tip and a threaded screw advanceable in said screw cylinder for injecting molten resin from said nozzle, said injection molding machine further having structurally associated therewith a stationary portion and a movable mold portion forming a mold parting line therebetween;
- a non-metallic injection mold comprising a cavity mold and a core mold forming a hollow therebetween for forming an injection molded product therein, said cavity mold being accessible by said stationary portion and said movable mold portion;
- a first molten resin flow path extending from inside said screw cylinder to a terminal end of said hollow; and,
- a pressure relief valve located on said mold parting line in an engaged state relative to said first molten resin flow path at said terminal end of said hollow
